NEW YORK STATE
SHORTHORN ASSOCIATION

President — WALTER MILLARD

Vice President — FRANK LAMPHIER

Secretary-Treasurer — DOUG LAMPHIER

Directors: GEORGE BILLINGTON, VIRGIL BRAISLAND, TOM PATTON,
DR. SHERWOOD

SHORTHORNS . . .

The Shorthorn animal has a long and well established history of existence, being one of the oldest breeds known to man. Originating in the Tees Valley of England they have spread out to nearly every major beef producing country in the world. Their adaptability to nearly every kind of climate and environment is unsurpassed. They entered the United States in 1783 and have since influenced many and varied purebreeding and crossbreeding programs. "No beef breed can match Shorthorns for cross-breeding superiority. Many breeds make claims but study the records. Over 30 recognized beef breeds in the world today owe part of their parentage to Shorthorn blood. This is more than the white face and black breeds can boast on a combined basis. For centuries Shorthorns have quality marked their progeny infusing their daughters with more milking, quicker cycling, easier calving, and fine foraging traits. In addition they have infused fast and economical gains, grading and cutting ability into the most docile, easily handled beef animal in the world . . . Right now the Shorthorn—Polled Shorthorn breed cannot begin to supply the demand for its bigger-sized bull productions. Fully 85 percent of all Shorthorn bulls sold this past auction season went for crossbreeding. Invariably the buyer states that he "wants to restore more of the milking and gaining ability he once had before using other breeds." Currently the Shorthorn female is enjoying a great demand from those engaged in production of "exotics." The evidence from numerous on-the-farm and on-the-ranch comparisons indicate that the Shorthorn-exotic cross rates the highest with the cattlemen."*

It is the responsibility of the purebred Shorthorn—Polled Shorthorn breeder to continue breeding the characteristics that have given the breed their appeal. Along with increasing the size and scale of our animals we need to be sure that we carry along with it, ease of calving, milking and mothering ability, fast gainability, high cutability, ease of handling, etc. to assure continued and expanding popularity of our cattle. Remember—all purebreeding and crossbreeding programs start with pure-bred and registered animals and we, as pure bred breeders, must see to it that they are correct animals and are truly what we know as SHORTHORN.

* By C. D. Swaffar, Executive Secretary, American Shorthorn Association, Omaha, Nebraska for The Ranchman magazine, Sept. 1971, Volume 32, Number 5

Weston Big Ben
or
Mr. Muscle

Turn your breeding program ahead 20 Years with a son or daughter of *BIG BEN*... The outcross bull with muscle and growthyness to burn and all in the right places. Bob Gordon of Kinnaber rates him as possibly the greatest muscled beef bull of this era...

Sangamon's cow herd is rated as one of the World's Strongest... Wherever a really great female is offered, Sangamon is usually the buyer.

Rothney Braw Bob's first calves won many Firsts at Major shows in 1973 including several All-Americans. A calf from a *Braw Bob* female sired by Big Ben should be the best.

Louada Designer is sireing calves of Championship Caliber. Watch for them in 1974.

WHY SEARCH THE WORLD FOR THE BEST WHEN THE BEST IS HERE IN NEW YORK STATE AT SANGAMON!!!!!!

Visitors always Welcome
